

Press release

Techno Tour 2010 in Russia

As the Techno Tour was very positively received in 2009, this successful event with presentations will also take place this year.

Techno Tour

In 2009, the Techno Tour was organized for the first time in twelve towns in Russia. The idea was to set up a series of events similar to the Info Tour, that takes place since several years now in Germany, Switzerland and Austria.

Selection of components

This year, the companies Bitzer, Danfoss and Güntner will participate with lectures at the Techno Tour. The topic of this year's lectures is the component selection for refrigerating plants. In particular, the event will focus on the selection of components for refrigerating installations for commercial and industrial refrigeration. The three participating companies will treat this topic from different angles. Alexei Kuznetsov, head of the Güntner Sales Office Moscow, and Oleg Romaniuk, sales engineer at the Güntner Office Moscow, will highlight specific characteristics of Güntner products and present examples of product applications.

First presentation in Nizhniy Novgorod

The first presentation was given on May 27 in Nizhniy Novgorod; further locations of the Techno Tour will be Kazan, Novosibirsk, Yekaterinburg, Rostov and St. Petersburg.

For further information, visit the Techno Tour website at:
